
KLIC

The Dutch one call system

Bart Koppens

CONCAWE COPEX 2014

Brussels

Content

- Introduction and brief history KLIC
- Classical KLIC-process 1967 – 2010
- WION legislation since 2008
- Facts and figures
- KLIC-online – area information
- KLIC2020
- INSPIRE

Introduction

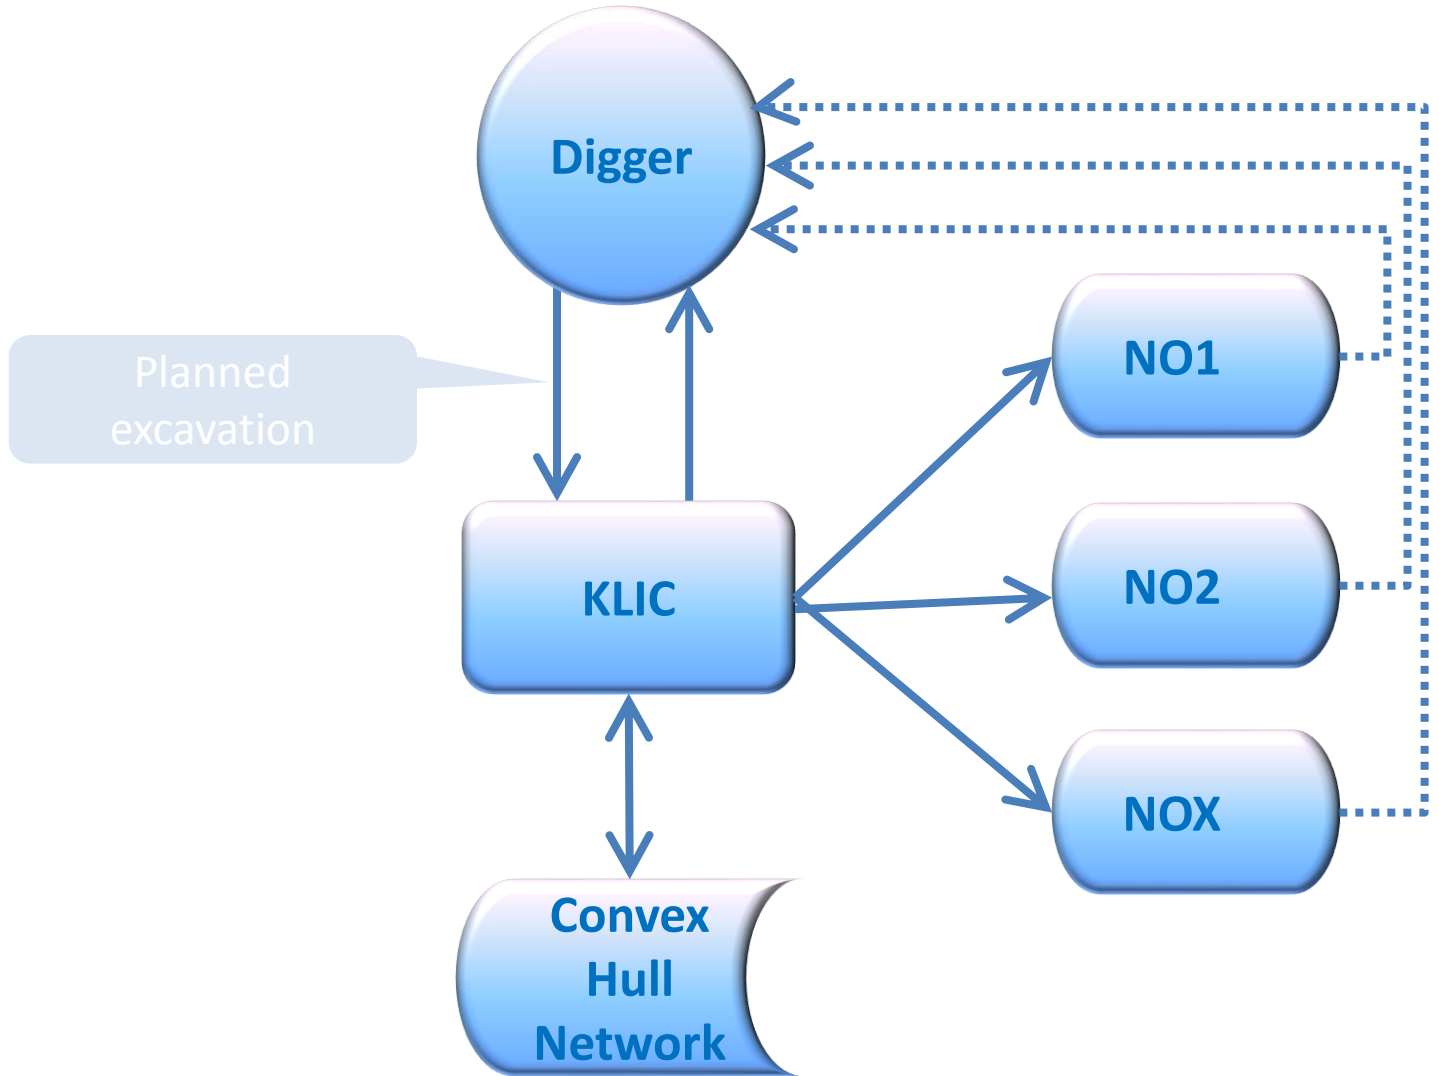

- Underground networks are essential for our society and economy
- Damage caused by excavation affects the security of supply of data, electricity, natural gas, oil or water. This means economic loss.
- High direct costs (repair of damage)

Brief history of KLIC

- 1967 first regional KLIC founded
- Model: one-call-system
- Non-profit foundation
- 1989 nation wide
- 2005 one organization

Classical process 1967 – 2010

WION legislation since 2008

- Mandatory participation for network operators
- Standardized digital information
- Mandatory request for scheduled excavations
- Obligated use of the information provided
- Kadaster built the system KLIC-online

WION legislation since 2008

- Agentschap Telecom is the regulator and enforcer
- Penalty for violation, maximum fines:
 - Network operator €450.000
 - Digger €100.000
- Rate financed (2013: €21,50 / request)

Facts and figures

Description	Amount
Underground cables and pipelines [km]	1.750.000
Network operators/managers	1.100
Annual notifications (request for info)	4.300.000
Annual excavation work	175.000
Annual excavation damage	35.000
Direct costs from damage [€]	40.000.000
Indirect costs [€]	??

KLIC2020 Future business

Excavators, network operators and managers of public spaces need:

- Further decline of excavation damage
- Improve efficiency
- Use of network information in other domains e.g.
 - Planning and zoning
 - Public order and security
- A rate financed information system

KLIC2020 User requirements

- High quality demands: ubiquitous
- Continuously available (24/7)
- Without waiting (near real time)
- Multiple maps (planned topography, soil type, ground water cadastral boundaries)
- A controlled process for registering digging applications

KLIC2020 User requirements

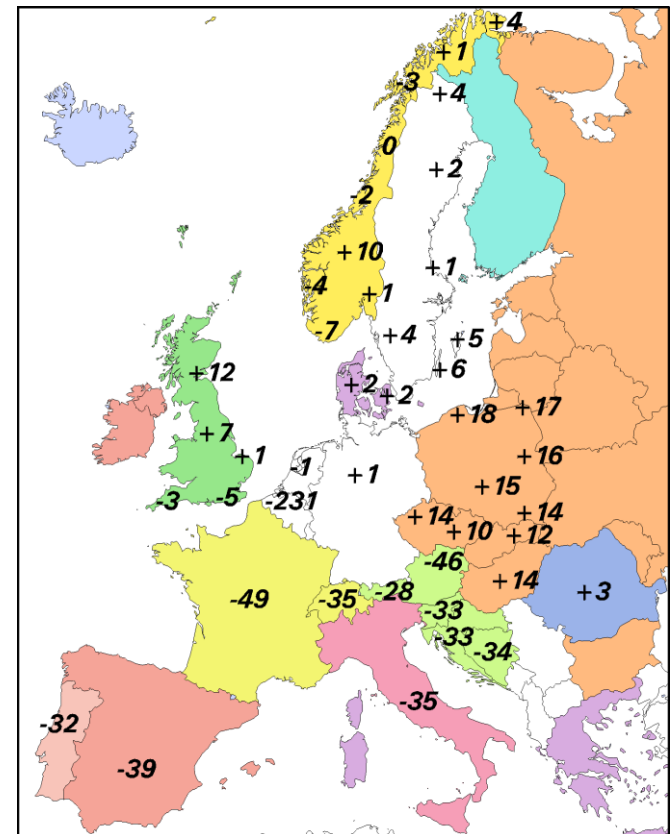

- Authenticated applicants and documenting their digging purposes
- Authorization based on applicant's profile and intended use
- Web service
 - View service (WMS)
 - Download service (WFS)

What about INSPIRE?

INfrastructure for SPatial InfoRmation in the Europe Community

- Find ability
 - Availability
 - Interchangeability
- Content in line within the EC*

INSPIRE – area information

Rich picture: points of view

KLIC2020 in line with INSPIRE US

- Unlock information of cables and pipelines
- Ubiquitous
- Web services WMS/WFS
- 100% of the network operators
- Preventing damage of Dutch networks
- Build on existing system

KLIC2020 in line with INSPIRE US

- We need to fit in:
- KLIC-service is a controlled process with authenticated authorized users
- Restrictions in case of excavations:
 - Point out the excavation area,
 - Reasonable time for precautionary measures
- Financing the service: rate per request
